TITLE: Remote control system for e.g. hot-water supply machine  
using gas as fuel - has display unit provided with  
character display section which displays character data  
that indicates appliance main body defect and  
corresponding repair process

ABSTRACTED-PUB-NO: JP 09280557A

BASIC-ABSTRACT:

The system has a remote controller (1) provided with a remote control unit (9) which controls the main body of an appliance. An operating unit (2) inputs a control signal to the remote control unit.

A display unit (8) is provided to display data which indicates the state of the appliance main body. The display unit includes a character display section (10) which displays character data, which indicates a defect and a corresponding repair process, when fault occurs in the operation of appliance main body.

USE/ADVANTAGE - Gas securing machine. Enables reliable, fast and accurate repairing of appliance main body by user even when user has no service manual, due to function of character display section. Enables accurate and fast maintenance servicing of appliance main body. Enables highly efficient remote control operation for repair and maintenance service.
